"Substantial" means that over 51 percent of the final processed product consists of agricultural commodities that were grown domestically.

Products from Guam, American Samoa, Virgin Islands, Puerto Rico, and the Northern Mariana Islands are allowed under this provision as territories of the United States.

The Buy American provision (7 CFR Part 210.21(d)) is one of the procurement standards SFAs must comply with when purchasing commercial food products served in the school meals programs.

Buy American: Schools participating in the federal school meal programs are required to purchase domestic commodities and products for school meals to the maximum extent practicable. Domestic commodity or product means an agricultural commodity that is produced in the US and a food product that is processed in the US substantially (at least 51 percent) using agricultural commodities that are produced in the US.

Federal regulations require that all foods purchased for Child Nutrition Program be of domestic origin to the maximum extent practicable. While rare, two (2) exceptions may exist when: the product is not produced or manufactured in the US in sufficient reasonable and available quantities of a satisfactory quality, such as bananas and pineapple; and competitive proposals reveal the cost of a domestic product is significantly higher than a non-domestic product. ALL products that are normally purchased by Distributor as non-domestic and proposed as part of this solicitation must be identified with the country of origin. Distributor shall outline their procedures to notify School when products are purchased as non-domestic. Any substitution of a non-domestic product for a domestic product (which was originally a part of the solicitation), must be approved, in writing 10 days prior of delivery date, by the Food Service Director, prior to the delivery of the product to the School. Any non-domestic product delivered to the School, without the prior written approval of the Food Service Director, will be rejected. Distributor must affirm their willingness to assert their best and reasonable efforts to ensure compliance with this federal rule.

JJ. DISCOUNTS, REBATES, ALLOWANCES AND INCENTIVES

The vendor shall fully disclose all discounts, rebates, allowances, and incentives received from its suppliers. The vendor must disclose and return to the Jefferson County Public School District, within a mutually agreed upon timeframe, the full amount of any discounts, rebates, or applicable credits that are received based on any purchases made on behalf of the District.

KK. COST REIMBURSABLE CONTRACTS

The following conditions apply to cost reimbursable contracts:

Allowable costs will be paid from the nonprofit school food service account to the contractor net of all discounts, rebates and other applicable credits accruing to or received by the contractor or any assignee under the contract, to the extent those credits are allocable to the allowable portion of the costs billed to the school food authority;

The contractor must separately identify for each cost submitted for payment to the school food authority the amount of that cost that is allowable (can be paid from the nonprofit school food service account) and the amount that is unallowable (cannot be paid from the nonprofit school food service account);

The contractor must exclude all unallowable costs from its billing documents and certify that only allowable costs are submitted for payment and records have been established that maintain the visibility of unallowable costs, including directly associated costs in a manner suitable for contract cost determination and verification;

The contractor's determination of its allowable costs must be made in compliance with the applicable Departmental and Program regulations and Office of Management and Budget cost circulars;

The contractor must identify the amount of each discount, rebate and other applicable credit on bills and invoices presented to the school food authority for payment and individually identify the amount as a discount, rebate, or in the case of other applicable credits, the nature of the credit. If approved by the State agency, the school food authority may permit the contractor to report this information on a less frequent basis than monthly, but no less frequently than annually;

The contractor must identify the method by which it will report discounts, rebates and other applicable credits allocable to the contract that are not reported prior to conclusion of the contract; and

The Contractor must maintain documentation of costs and discounts, rebates and other applicable credits, and must furnish such documentation upon request to the school food authority, the State agency, or the Department.

Prohibited expenditures. No expenditure may be made from the nonprofit school food service account for any cost resulting from a cost reimbursable contract that fails to include the requirements of this section, nor may any expenditure be made from the nonprofit contractor receiving payments in excess of the contractor's actual net allowable costs.

NOW, THEREFOR, in consideration of the mutual promises and agreements hereinafter set forth, the parties hereby agree as follows:

Such causes may include, but shall not be limited to, the public enemy, actions of the Government of the United States or the Commonwealth of Kentucky in either their sovereign or contractual capacities, fires, floods, epidemics, quarantine restrictions, strikes, freight embargoes and unusually severe weather; but in every case, the failure to perform must be beyond the control and without fault or negligence of the Contractor. If the failure to perform is caused by the inability of the Contractor to obtain materials or goods essential to the performance defined in Article II of this Contract, from the Contractor's usual source, the Contractor shall not be liable for any excess costs for failure to perform, unless such materials or goods were obtainable from other sources in time to permit the Contractor to meet its required schedule.

E. If this Contract is terminated as provided in paragraph (A) or (B) above, the Board, in addition to all other rights provided in this Article, may require the Contractor to transfer title and possession and to deliver to the Board, in the manner and to the extent directed by the Director of Purchasing, any and all materials or goods defined in Article II of this Contract in possession of the Seller prior to the receipt of the notice of termination required by paragraph (A) or (B) above. Furthermore, the Contractor shall, upon the direction of the Director of Purchasing, protect and preserve any goods in the possession of the Contractor in which the Board has an interest. Payment for goods accepted by the Board shall be in an amount agreed upon by the Contractor and the Director of Purchasing; failure to agree to such an amount shall be a dispute within the meaning of Article X entitled "Disputes". The Board may withhold from amounts otherwise due the Contractor for goods accepted by the Board such sum as the Director of Purchasing determines to be necessary to protect the Board against loss because of outstanding liens of claims.

F. If, after notice of termination of this Contract under the provisions of this Article, it is determined for any reason that the Contractor was not in default under the provisions of this Article, the right and obligations of the Parties shall be the same as if the notice of termination was issued pursuant to the provisions of Article IX of this Contract.

G. The rights and remedies of the Board provided in this Article shall not be exclusive and are in addition to any other rights and remedies provided by law or under this Contract.

This proposal and the contract(s) resulting therefrom, constitute the estimated requirements for the Board of Education on common size tires and tubes normally stocked and regularly used.

#### ADJUSTMENT

Bidder guarantees to make adjustments on defective products, if any, and the price paid shall be the basis of such adjustment. The period in which adjustments under this clause can be made shall be as outlined on the last page of these specifications in Paragraph "E" under "Other Requirements and Conditions".

#### QUALITY

Quality shall be at least comparable to Class I, current production tires and tubes of latest design, content and construction. The tires should be recognized in the industry as first line, first grade production and should be of no lower quality than tires normally furnished as original equipment for automobiles, trucks, tractors and similar vehicles.

#### REQUIREMENTS FOR TIRES

- (A) Compound - Pneumatic tires furnished under this specification shall be compounded from natural rubber, synthetic rubber or a suitable combination thereof.
- (B) Design - The tires and all component parts thereof shall be designed to give satisfactory service when installed on vehicles or other tire-using equipment of the Board of Education and when operated under conditions for which they were designed. Servicing, adjustment and replacement shall be readily accomplished under various road conditions as found in this area.
- (C) Form - Each tire shall be of a form adopted to enclose an inner tube containing air under pressure. The tire shall also properly fit a rim recommended for the tire, inspected and approved by the Tire and Rim Association, Inc. Exception will be made where tubeless tires are specified.
- (D) Component Parts - Each tire shall consist of component parts described below, except that deviations therefrom in accordance with the manufacturer's standard practice shall be permitted when such deviations result in a tire suitable for the intended purpose and as approved by the Director of the Purchasing/Bid Department.

Carcass - The carcass shall consist of plies of rubberized cord of material suitable for the intended purpose. The carcass may be reinforced with breaker strips designed to improve impact resistance. Any type of tire cords may be used at the option of the manufacturer, for passenger car, light truck and for 750 x 20, Load Range D and smaller truck tires. Rayon cords or nylon cords shall be used for 750 x 20, Load Range E and larger truck tires and bus tires. Other cords may be used, provided they are the manufacturer's regular production and otherwise meet the performance requirements of these specifications.

Tread and Tread Design - Tread design shall be the manufacturer's standard highway type unless otherwise specified and shall be suitable for minimizing skidding, resisting abrasion and protecting the carcass from injury.

Sidewall - The sidewall compound shall be designed to protect the carcass against abrasion or other injury, moisture and weathering.

Bead - The bead shall be of such construction as to anchor the tire firmly to the rim without slippage under normal operating conditions and of such design as to fit Tire and Rim Association standard rims, to include both those described by present rim standards and those of earlier standards for rims which are still in service in large numbers.

REQUIREMENTS FOR RECAPPING TIRES - (ITEM NO. 29)

SCOPE - It is the intent of these specifications to establish minimum standards through which the Jefferson County Public School (JCPS) District will purchase retread tires which meet the wet traction specification as listed in the Kentucky Minimum Specifications for School Buses, Revised 2013. In addition to meeting the traction performance requirement, this specification establishes minimum standards dealing with tire rubber physical properties, minimum tread dimensions, casing acceptance, and casing preparation for tread.

RETREAD SYSTEM

Retreaders must use the Pre Cure System. Recaps are to be capped using the Bandag or equal top cap.

DIMENSIONS

Minimum Tread Dimensions:

<u>Tire Size</u>	<u>Tread Depth (Inches)</u>
265/70R19.5	16/32

TREAD SPLICES

Retread tires shall not have more than two (2) splices in top cap. No more than one (1) splice per quadrant shall be permitted.

UNDER TREAD RUBBER THICKNESS

Under tread rubber thickness shall be twenty (20) percent minimum to twenty-five (25) percent maximum of tread depth. Casing shall be prepared to receive under tread rubber thickness of 3/32" to 5/32" maximum.

CASING ACCEPTANCE

The qualifying retreader shall be the party in all cases making determination with regard to casing acceptance or rejection. Previously retreaded tires having retread installed improperly with regard to dimensional requirements of the original tire manufacturer and/or have casings rounded to receive a retread of a different dimensional width shall be rejected. Rejected casings shall be returned to JCPS. It is recommended that a nondestructive inspection method be used to analyze grade casings to find hidden anomalies, separations, injuries, etc. and to determine whether or not a casing is acceptable for a given application and operation.

## SPECIFICATIONS - Cont.

### CASING PREPARATION

The casing shall be buffed to dimensions compatible to the retread system used. The worn tread surface shall be removed to a symmetrical profile in accordance with the procedure and new tire manufacturer specifications. The buffed area of the casing shall be free of contamination and oxidation. All buffing shall be done with the casing inflated. **Casing preparation shall be performed to require original tire manufacturer tread width installation only when applying a retread dimensionally.**

### CASING REPAIR (Radial Only)

All casings shall be repaired in accordance with International Tire and Retreaders Association (ITRA) tire repair standard. (Exceptions to repair size listed below)

### REPAIR TYPE

1. Nail Hole (puncture) cannot exceed one-fourth (1/4) inches diameter. Nail hole repairs IN THE CROWN OF THE TIRE ONLY!
2. Spot Repair - Spot repair is limited to cuts or crack in rubber with no damage body plies.
3. Section Repair - Section repair shall be limited to virgin casings only. Section shall be performed to International Tire and Retreaders Association (ITRA) specifications with the exception of limiting repair size to one (1) inch in crown area and maximum of two (2) cables in the sidewall area with a maximum of three (3) inch length. All section repairs shall require prior approval of the Body Shop Foreman, Vehicle Maintenance Department of JCPS.
4. Bead Repair - The following conditions will be considered repairable in the rubber covering the bead area.
  - a. Cuts or tears in the rubber covering the bead area that do not damage the body plies or expose bead wires
  - b. Limited in size to that which will assure duplication of original bead contours
  - c. Repairs that can be performed at a cost low enough to be practical
5. Sealant Materials - Sealant Materials for tire repairs shall be approved by International Tire and Retreaders Association (ITRA).
6. Repair Identification - (Sections) Retreaders shall affix a permanent identification label in the area of the section repair and subsequent section repairs.

### CASING IDENTIFICATION

JCPS shall supply form identifying casings by brand name, size and serial number prior to pickup by retreaders. Retreader shall designate on the form the acceptance or rejection. Casings being returned shall be designated on the form at time of return by date and signature of returning agent.

### DOT NUMBER

DOT numbers shall be affixed to all tires per federal standards. On pre-cured retreads, DOT numbers shall be affixed in close proximity to existing DOT numbers reading from the left to the right. (On mold cure retreads, pre-existing DOT numbers may be removed during the succeeding process.)

### WARRANTY

Retreaders shall warrant workmanship and materials one hundred (100) percent for the first ten (10) percent of tread wear. Workmanship and materials shall be prorated from the first ten (10) percent of tread wear to 2/32" remaining tread depth. Casing failures shall be warranted one hundred (100) percent through the first twenty-five (25) percent of tread wear and fifty (50) percent for the next twenty-five (25) percent of tread wear. Warranty cost is applicable only as it relates to retreading and/or casing repair cost and not to casing replacement.

## SPECIFICATIONS - Cont.

### LONGEVITY

Retreaders supplying retread tires to JCPS shall supply retreads designed to provide tread life no less than ninety (90) percent on a per one-thirty second (1/32) inch basis as compared to original equipment tires for respective duty cycles.

### CERTIFICATION

The qualifying retreader shall have been certified by a retreader trade association, franchiser, and/or the International Tire and Retreaders Association (ITRA) for quality within a twelve (12) month period preceding the award of a contract.

### DELIVERY

Under the agreement of this specification after notification from JCPS, the qualifying retreader shall be required to pick up JCPS supplied casings, retread and deliver tire orders to JCPS within ten (10) working days of order:

Nichols Garage  
3686 Parthenia Avenue  
Louisville, KY 40215

### APPROVAL OF QUALIFICATION

Qualification shall require wet traction test (ASTM F403-98 Modified for medium duty truck tires) comparison to a control tire with all pertinent testing information, technical data, tire description, and a tread footprint. For the purpose of this test the Goodyear G159 shall be used as the control tire.

### WET BRAKING TRACTION TEST PROCEDURE SPECIFICATIONS

Wet braking traction testing will be conducted in accordance with the applicable sections of ***ASTM F408-99**, Standard Test Method for Wet Traction Straight-Ahead Braking, Using a Towed Trailer*, except as modified herein:

The vehicle is an instrumented truck with a load cell installed on the left rear drive axle position, not a separate tow vehicle and instrumented trailer. The responses are similar to that of a towed trailer; therefore, when the trailer or tow vehicle is referenced in this procedure, it is assumed that the truck test vehicle is appropriate.

- A. The test vehicle shall be a semi-tractor or straight truck with a single drive axle and the capacity to allow the test wheel position to be loaded from twelve hundred fifty (1,250) to eight thousand (8,000) pounds. The test vehicle will have an instrumented load cell installed on the drive axle. The **2011 Kentucky Minimum Standards for School Buses** 106 braking system must be modified to allow braking on only the test wheel position. Brakes are applied firmly until the test tire is locked and then held locked for a period of one and one-half (1.5) seconds.
- B. Testing will occur at test speed of twenty (20) mph.
- C. All un-mounted tires must be stored at the same conditions at least twenty-four (24) hours prior to mounting.
- D. All tires must be conditioned by mounting them on the drive wheel positions of a vehicle loaded such that the tires have a load similar to the load under which they will be tested. The purpose of the tire break-in will be to remove mold lube from all tires, give tires a worn appearance and stabilize tire compounds. The conditioning for medium truck tires will require the following:
  1. Mount tires on vehicle and run fifty (50) miles on test track.
  2. Reverse direction and run fifty (50) additional miles.
  3. Rotate all tires.
  4. Run fifty (50) additional miles in either direction.
  5. Reverse direction and run fifty (50) additional miles.

SPECIFICATIONS - Cont.

WET BRAKING TRACTION TEST PROCEDURE SPECIFICATIONS - Cont.

- E. Test tires will be run two hundred (200) miles on paved roads on the test track location.
  - 1. Mounted test tires shall be placed outside near the test site at least twelve (12) hours prior to testing so that they will have the same temperature. Storage should be such that test tires are shielded from the sun under a tent to avoid heating by solar radiation.
  - 2. Test loads for medium truck tire testing will be according to the following table:

<u>Tire size Metric</u>	<u>Tire size (Conventional)</u>	<u>Load per tire (+ 5%)</u>	<u>Inflation (+ 2%)</u>	<u>Reference tire size</u>
Light Truck			50 psi	(Based on ASTM 1805-98 specs)
225 through 265	8 and 9	4,525 lbs.	90 psi	(Based on 10R22.5 @ 90 psi)
275 through 295	10 and 11	5,260 lbs.	90 psi	(Based on 11R22.5 @ 90 psi)
305 through 325	12	5,197 lbs.	100 psi	(Based on 315/80R22.5 @ 100 psi)
365 through 445		7,500 lbs.	110 psi	(Based on 385/65R22.5 @ 110 psi)

Table applies to tubeless truck tires only (not applicable for off-road or agricultural tires). Loads and inflation for any tires not listed should be reviewed prior to testing.

- a. Water depth will be maintained at a minimum of .050 inches and a maximum of .10 inches throughout the testing period.
- b. Test vehicle must maintain a ground speed of twenty (20) mph + .5 (target) mph. Data acquired with a ground speed beyond one (1) mph from the twenty (20) mph specification will be removed.
- c. Fifteen lockups will be completed for each variable. Data beyond 1.5 standard deviations.

Refer to ASTM F1805, "Standard Test Method for Single Wheel Driving Traction in a Straight Line on Snow and Ice-Covered Surfaces", Section 13, "Data Adjustment Procedures" for a description on the procedures used for wet braking traction data adjustments. Specifically, the gradient correction method and average correction method are used. F1805 also references ASTM F1650-98, "Practice for Evaluating Tire Traction Performance Data Under Varying Test Conditions."

MISCELLANEOUS SPECIFICATIONS

- 1. All tests should be conducted over the period of at least three (3) days (one pass of the test sequence per "24 hour period" for three (3) consecutive days.)
- 2. Three (3) tires per test variable will be used for testing, and each tire will be used for one (1) run only. Test sequence will be randomized within each test run.
- 3. A maximum coefficient of variation (CV) of fifteen (15) percent will be maintained for each test run. No test run should be repeated when the (CV) is less than fifteen (15) percent.

PROGRAM CONTROL TIRES

As much as possible, a standard control tire will be used whenever wet braking traction testing is conducted. This tire will be retread onto a casing of similar size, series, load range, and age as the test tires for that test group. Testing will be conducted under the same conditions as the test tires, and the coefficients obtained for the test tires will be compared to the coefficients obtained for this control tires to obtain the test tire ratings. Retread manufacturers shall be required to certify to JCPS as part of their bid, their tire traction performance using ASTM Standard F403-74 testing procedures.

CERTIFICATION

Prior to the sale of retread tires to JCPS District, retreads shall qualify their retread tires as a part of their bid submission and as meeting the above mentioned performance standards.
